Stewart EFI, LLC Expands its El Paso, TX Facility to Better Serve the Growing Mexican and Southwestern US Markets

El Paso, TX – October 2007 – Stewart EFI Texas, LLC has added 33,000 square feet (3,065 m²) to its existing manufacturing facility bring the total facility to 72,000 square feet (6,690 m²). This expansion will allow Stewart EFI to better serve their existing customers, provide for both current and future growth and make space available for the expansion of its capabilities into larger presses.

“Our expansion plans were the result of the increasing requirements for precision stamped and drawn metal components from demanding world-class manufacturers in the rapidly growing Mexican and Southwestern US markets and their need to work with a company such as Stewart EFI, that has the robust quality and lean manufacturing systems necessary to compete in today’s competitive environment” said John D. Labas, Vice President of Sales & Marketing.

Stewart EFI, with over 300 employees and operations in Yonkers, NY, Thomaston, CT and El Paso, TX, ranks among the largest suppliers of small precision metal stampings in the world. Its capabilities include deep drawn, progressive die and four-slide metal stampings, wire forms and automated and secondary assembly. The company’s primary markets include automotive, electrical, electronics, consumer, defense and medical. Stewart EFI’s products are sold worldwide.
