For Immediate Release

Stewart EFI Texas, LLC Awarded \$3 Million Stamping Contract From Major Tier 1 Automotive Supplier

Yonkers, NY – January 2007 – Stewart EFI, LLC has been awarded \$3 million a year in business from a Tier 1 Automotive supplier. This package of progressive die and slide formed metal stamped components was previously produced in-house by this automotive supplier. The vast majority of this work will be produced in Stewart EFI's El Paso, Texas facility and is destined for the customer's using plants in Mexico. Production on this program began in the 4th quarter of 2006.

"Stewart EFI Texas is proud to be the recipient of such a significant program and reflects the efforts of all of our people in meeting our customer's high quality demands and sustaining the performance that results in our customers wanting to place more business with us" said Merrill Leach, Plant Manager.

Stewart EFI, with over 300 employees and operations in Yonkers, NY, Thomaston, CT and El Paso, TX, ranks among the largest suppliers of small precision metal stampings in the world. Its capabilities include deep drawn, progressive die and four-slide metal stampings, wire forms and automated and secondary assembly. The company's primary markets include automotive, electrical controls and switches, electronic components, consumer, cosmetics and medical. Stewart EFI's products are sold worldwide.
